Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: a proposed amendment was discussed that included limitations that the "inner surface of the outer member being not bonded to the outer surface of the inner member and the inner surface of the outer tubular member defines sections of the inflation lumen". It was noted that all claimed limitations must be shown in the drawings and supported in the specification. It was also noted that a reference must be considered in its entirety and there are other embodiments in the Burns reference to consider.
